Direct Real Estate

(1) Direct core and value real estate performance is time series weighted and based on property distributed income and capital appreciation/depreciation resulting from external appraisals and dispositions. PRIM's real estate appraisal policy requires that approximately one quarter of the directly owned properties be appraised by a real estate appraiser with an MAI designation every quarter. The goal is to obtain updated market values for each property annually.

(2) The NCREIF Property Index (NPI) is an unleveraged, time series composite measurement of the investment performance of a large group of commercial real estate properties. The NPI is released 25 days after the end of each quarter. Because Mellon's performance report is released earlier, the NPI used as benchmark is lagged one quarter.

(3) Direct Real Estate Manager NAV's are net of property level debt.

Timberland

(4) PRIM's Timberland/Natural resources appraisal policy states that all timber/natural resources properties be externally appraised every three years using a full narrative report format. These reports (and property values) are then updated annually by a Timberland/Natural Resources Appraiser to reflect changes in timber markets, inventories and land values. The goal is to obtain market values for each timberland annually.

(5) PRIM's timberland portfolio currently does not utilize leverage.

(6) The NCREIF Timberland Index (NTI) is an unleveraged, time series composite measurement of the investment performance of individual timber properties. The NTI is released 25 days after the end of each quarter. Because Mellon's performance report is released earlier, the NTI used as benchmark is lagged one quarter.

REITs

(7) The FTSE NAREIT ALL EQUITY REITS Index is an unmanaged index of publicly traded U.S., tax-qualified REITs that have 75% or more of their gross assets invested in the equity ownership of real estate. This index does not include Real Estate Operating Companies (REOCs) although these are acceptable investments as part of the manager's guidelines and included in PRIM's REIT holdings.

(8) The FTSE NAREIT ALL EQUITY REITS index can be considered a "leveraged" index given that the majority of the REITs included in the index use leverage as part of their investment strategy.

ETI

(9) Real estate ETI Funds are primarily invested in development projects with a three to five year lifecycle. These investments require substantial capital investment with very little income during the initial stage of the cycle, resulting in a J curve return profile. The returns are expected later in the cycle, upon project completion and lease up. For lack of a better benchmark, the NPI which is a core property benchmark used to track stabilized, institutional grade properties is used by PRIM. However, Staff is focused more on deal flow quality and on returns generated relative to the risk adjusted returns projected by Managers in their offering memoranda.

Private Equity

(10) Private Equity performance represents time weighted returns reflecting the most recent partnership financial statement valuations (typically lagging one calendar quarter) adjusted for actual cash flows through the reporting date. The Private Equity portfolio consists primarily of assets that are illiquid in nature, and valuations are determined by the General Partner based on current industry fair market value practices. Limited Partnership valuations are reviewed through a formal audit process annually, and valuations are also commonly reviewed by partnership advisory boards on a quarterly basis.

Hedge Fund of Funds

(11) The Hedge Fund of Fund valuations are net of underlying manager fees and net of all Hedge Fund manager administrative, base and performance fees.

Liquidating Portfolios

(12) Total Liquidating Portfolios was created to include both Portable Alpha and Global Natural Resources effective 1/1/2016 going forward. Prior to 1/1/2016 the Global Natural Resources return and benchmark was comprised of Timberland, Natural Resources Public and Natural Resources Private. The Natural Resources-Private and Public history remains in the PRIT Fund return and benchmark prior to 1/1/2016.

Overlay

(13) Overlay returns presented are unlevered through 12/31/2022. As of 1/1/2023, returns presented are levered.

Implementation Benchmark

(1) Implementation benchmark is calculated by applying the investment performance of the asset class benchmarks to the Fund's asset allocation targets through 3/31/2020. Currently the Implementation benchmark is calculated by applying the investment performance of the asset class benchmarks to the asset class weights within the Fund's portfolio. The PE component of this uses the S&P 500 + 5% through 6/30/2000; Actual PE Performance through 6/30/2021; currently State Street PE Index (SSPEI) ALL PE excluding Private Debt. The Private Debt component of this uses the Altman NYU Salomon Center Combined Defaulted Public Bond & Bank Loan Index through 6/30/2017; actual Private Debt Performance through 12/31/2021; currently Burgiss Distressed Debt Universe Lagged, if the Burgiss return is not available, the actual portfolio net return will be used as a placeholder until the Burgiss Private Debt BM is published. The Stable Value HF and Directional HF components within the Total PCS BM component of this are calculated by applying the underlying benchmark return for each manager to the manager's weight within the Stable Value HF and Directional HF Composites, respectively. The OCO component of this uses the underlying benchmark return for each manager to the manager's weight within the OCO Composite through 9/30/2023; currently Burgiss Mezzanine Debt Universe Lagged, if the Burgiss return is not available, the actual portfolio net return will be used as a placeholder until the Burgiss Mezzanine Debt BM is published. (Formerly labelled Interim Policy Benchmark.)

Total Core Benchmark

(2) The Total Core benchmark is calculated by applying the investment performance of the asset class benchmarks to the Fund's asset allocation targets through 3/31/2020. Currently the Total Core benchmark is calculated by applying the investment performance of the asset class benchmarks to the asset class weights within the Fund's portfolio. The Private Equity benchmark used for the Total Core benchmark calculation is the 7-year annualized return of the Russell 3000 +3%, through 6/30/2017; currently the calculation is the 7-year annualized return of a blend of the Russell 3000 +3% and MSCI Europe IMI + 3%. The Private Debt component of this uses the Altman NYU Salomon Center Combined Defaulted Public Bond & Bank Loan Index through 6/30/2017; using the 3-year annualized return of the Altman NYU Salomon Center Combined Defaulted Public Bond & Bank Loan Index through 12/31/2021; currently Burgiss Distressed Debt Universe Lagged, if the Burgiss return is not available, the actual portfolio net return will be used as a placeholder until the Burgiss Private Debt BM is published.
